

**NOTES:**

1. All house perimeter foundation labels and dimensions are measured to the outside of the foundation; fascia brick / brick ledge and siding are not measured as part of the foundation. All dimensions are measured perpendicular to the property lines.
2. All lot grading, erosion and sediment control, and other site construction activity shall be in accordance with the approved construction plans for this subdivision project.
3. The drive connecting to the public street shall be constructed 17 feet wide at the right-of-way, with a 5' taper or 5' radius, as shown.
4. The individual lot operator shall be responsible for installation and maintenance of proper erosion and sediment control measures, until the lot is stabilized. Erosion and sediment control measures must be functional and maintained throughout construction.  
  
Install and maintain a temporary gravel construction entrance at the same location as the proposed drive. Install and maintain a silt fence at the lot perimeter or as shown on this plan.  
  
Sediment discharge and tracking from lot shall be minimized. Streets shall be kept clear of dirt and debris. Disturbance to adjacent lots shall be kept to a minimum. Adjacent lots disturbed by an individual lot operator must be repaired and stabilized immediately.
5. This drawing is not intended to be represented as a retracement or original boundary survey, a route survey, or a surveyor location report.
6. The lot pad grade and house foundation Finished Floor (FF) elevation shall comply with the recorded Final Plat and approved construction plans for this subdivision and phase.
7. The Lot Number, Area, and Address shown hereon are taken directly from the Recorded Final Plat of the named subdivision; John E. Fisher & Associates, P.C. is not responsible for inaccuracies contained therein.
